

# PERFECTOPTICAL

The new Perfect Optical Lab is quickly becoming the go-to lab for many high-end optical stores in NY. Since our move two years ago, we have placed a tremendous emphasis on quality, precision and turn around.

- We have recently Installed two full state-of-the-art automated digital lines, to ensure no down-time, even during maintenance periods.
- We now provide same day Crizal coating, as well as the popular Perfecta Platinum AR. All produced in our brand new Crizal coating center.
- We have recently upgraded our finishing equipment with a new MEI edger, to ensure that the final product will be of utmost perfection. Another MEI is on its way.
- We have implemented extended lab hours, for unparalleled turn-around.
- We have hired new personnel with extensive previous experience in the most quality conscious opticals in the city.
- Special emphasis added to our quality control department to make sure only the highest standard work passes our inspection.
- We have now partnered with Uber, for the quickest and most reliable delivery in NYC, guaranteeing the deliveries sometimes in a matter of an hour, from time of order placement.
